

DC3500

3500mA LAPTOP POWER ADAPTOR

“ The easiest and most convenient method of powering any popular laptop computer while on the road. ”

FEATURES

On The Road Power

Safely converts 12V power to specific voltages required by laptop computers allowing indefinite power while away from the office or home.

Recharges your Battery

The DC3500 powers and recharges your laptop battery at the same time. This means your laptop battery will be fully charged when you disconnect from the DC3500 giving you extra running time.

Adjustable Power Output

Features a switch that offers 7 voltage settings between 15 and 24 Volts. A specially designed screwdriver is supplied for easy switching

Stored Lead

A 1.8 metre lead allows use from anywhere in the vehicle. The lead stores away inside the unit for easy and tidy use when in the front seat.

Fuse Protection

A 10 Amp inline fuse provides protection for your vehicle & laptop computer.

Suits all popular Laptop Computers

Six different connector pins are supplied to suit the following brands of laptop computers:

- Acer
- Compaq
- Dell
- Hewlett Packard
- IBM
- Toshiba
- Gateway
- Sharp
- Sony
- Panasonic
- Hitachi
- NEC
- Fujitsu
- Samsung
- Epson
- Asus
