

DC6000

6000mA LAPTOP POWER ADAPTOR

“A more powerful 6000mA laptop adaptor suitable for running laptop computers with higher demands while on the road.”

FEATURES

On the Road Power

Safely converts 12V power to specific voltages required by laptop computers allowing indefinite power while away from the office or home.

Recharges your Battery

The DC6000 powers and recharges your laptop battery at the same time. This means your laptop battery will be fully charged when you disconnect from the DC6000 giving you extra running time.

Adjustable Power Output

Features a switch that offers 7 voltage settings between 15 and 24 Volts. A specially designed screwdriver is supplied for easy switching

Long Lead

A 1.8 metre lead allows use from anywhere in the vehicle.

Fuse Protection

A 15 Amp inline fuse provides protection for your vehicle & laptop computer.

Suits all popular Laptop Computers

Six different connector pins are supplied to suit the following brands of laptop computers:

- Acer
- Compaq
- Dell
- Hewlett Packard
- IBM
- Toshiba
- Gateway
- Sharp
- Sony
- Panasonic
- Hitachi
- NEC
- Fujitsu
- Samsung
- Epson
- Asus
